Upcoming Schedule – Winter 2012

February 15th – Introduction to Building Science and Home Performance Diagnostics - Free

A 3-hour classroom introduction to residential building science followed in our lab with hands-on training on the blower door and duct blaster. Call or email to register!

February 23rd – EPA 608 Refrigerant Class \$200 - <https://www.regonline.com/cscweatherizationtrainingepa608class>

Mark Jerome of KAM Energy will lead this class on Section 608 of the Clean Air Act which enforces activities that protect the ozone layer as they apply to stationary refrigeration and air conditioning systems. Attaining these credentials will let you handle various types of refrigerants for commissioning heat pumps and air conditioners.

February 24th – PTCS Heat Pump Class \$200 - <https://www.regonline.com/cscwxtrainingptcsheatpump>

Mark Jerome will lead this PTCS Class on commissioning and troubleshooting heat pumps.

February 27th – Weatherization Training Center -OPEN HOUSE- 3pm to 5pm

February 28th – DOE Energy-related Mold and Lead Safe Weatherization \$95 – Call or Email

This 8-hour training focuses on identifying many residential contaminants of concern, building durability issues, and ways to reduce client impacts with source control and proper work techniques. Pre-requisite: 8hr – EPA Lead RRP

March 1st – Lead Safety for Renovation, Repair and Painting \$250 http://www.regonline.com/cscwxtraining_RRP

This training course presents procedures for minimizing lead dust generation and soil contamination during maintenance/renovation/remodeling activities as defined by the U.S Environmental Protection Agency (EPA) and the U.S. Department of Housing and Urban Development (HUD).

March 7th – Introduction to Building Science and Home Performance Diagnostics - Free

A 3-hour classroom introduction to residential building science followed in our lab with hands-on training on the blower door and duct blaster. Call or email to register!

March 13th to 15th – PTCS Duct Sealing \$500 <http://www.regonline.com/cscwxtrainingmarchptcsductsealing>

This class is a great introduction to house pressure diagnostics and a “House as a System” approach with training on the manometer, duct blaster and blower door as well as duct fastening/sealing materials and applications. This class is a great introduction for BPI’s Building Analyst or OECA’s Energy Analyst and counts for 7.5 BPI CEU’s.

March 26th to 30th – Spring Break BPI Building Analyst \$1,695 http://www.regonline.com/cscwxtrainingMarch_BPI_BA

Dennis Feeney who will be leading this class on a comprehensive approach to energy auditing focused on building science and pressure diagnostics in order to evaluate residential energy consumption, indoor air quality and prescribe appropriate building retrofits. (All materials and testing fees included)

A training grant may be available – call or email to inquire
