

Training Resources

You will receive many benefits from our cutting-edge program: sample weatherization kits, designs and plans for interactive models, supplemental DVD for training back at the office, or even participate in a Community Weatherization Field Trip with our staff and volunteers! We design unique experiences for each client.

Portable Weatherization Models

Our Clients Say...

"I've heard about CEP's success and I wanted to learn about ways to inspire our entrenched program."

"This is a very thorough, information packed training. I think it should be the gold standard for CAP agency training (and others)."

"Thanks again for putting together such a terrific, comprehensive curriculum. I really enjoyed the emphasis on cultural competence, literacy, and how people learn. This stuff is too often taken for granted..."

About CEP

Community Energy Project Inc. is a 501(c)3 nonprofit organization that for 30 years has been empowering people to:

- Maintain healthier, more livable homes
- Control utility costs
- Conserve natural resources

Get Results Like These...

After attending a two-hour CEP workshop, our community workshop participants spend an average of five hours weatherizing their homes.

They told us that *it pays to weatherize!*

- Between 70% and 80% of workshop participants report saving money on their heating bills.
- Participants reported saving an average of \$30 per month in the winter!
- 92% of participants said they learned something new at the workshop.
- In a long-term follow-up survey (conducted between 1 and 2 years after the workshop) 82% of participants report reusing items from their weatherization kit.

Our program development is based on 25 years of physical site verifications and follow-up visits to 15-20% of our community workshop participants each year.
