

Small-Measure Weatherization: Facilitating Community Empowerment, Education, and Involvement *a Training for Energy Educators*

“Small-Measure Weatherization: Facilitating Community Empowerment, Education, and Involvement” is a training for energy educators based on Community Energy Project’s nearly 30 years of success implementing a community-based, energy education program. CEP provides thousands of low-income households the means to make energy-saving behavioral changes and install low-cost, small measure weatherization materials through interactive, do-it-yourself (DIY) workshops. The training also provides tips and lessons learned for recruiting and training hundreds of volunteers to install materials for senior citizens and people with disabilities who experience barriers to utilizing the DIY weatherization kits.

Sponsored by:

Reliant Energy Settlement Funds

Wednesday, November 12th, 2008
10:00 am - 2:00 pm
Architectural Heritage Center
701 SE Grand Ave, Portland
<http://www.visitahc.org/>

This training is **FREE** to Oregon nonprofits that provide energy education for low-income families. Participating Oregon nonprofit organizations will receive:

- Sample DIY weatherization kit
- Workshop curriculum and PowerPoint slides
- Portable interactive weatherization model with drawings
- Supplemental DVD
- Resource binder
- Opportunity to network with other organizations and share ideas
- Phone/email consultation and support after the training
- “Low carbon footprint” lunch provided
- Mileage reimbursed
