

Since 1979, Community Energy Project has been empowering people to maintain healthier, more livable homes, control their utility costs, and conserve natural resources.

We conduct **free DIY workshops** on weatherization and lead poisoning prevention.

We provide in-home weatherization and safety repairs for low-income seniors and people with disabilities.

CEP Sponsors

- ❖ Portland Housing Bureau

Empowering People – One Home at a Time

We envision a future where all people can afford to live in their homes with dignity, comfort, and safety.

Volunteer With Us

Are you looking for a great idea for a group project? Perhaps you're part of a club, looking for team-building opportunities or a way for your company to become more active in your community. Perhaps you want to volunteer with your family or friends, or come on your own.

CEP volunteers have been helping their community for nearly 30 years in a wide variety of ways. In a single afternoon a community weatherization team can weatherize the home of a senior citizen or person with a disability, or teach a group of new parents how to protect their family from lead poisoning, and more.

Get Involved...

- ❖ As an individual. After an interview and orientation you can volunteer on your own time. (Minors must be accompanied by an adult, those under 14, a parent or guardian.)
- ❖ In a group. Whether through your employer, high school, or church group - we can accommodate up to 15 people in a day during the winter.
- ❖ Through an internship program. Established programs such as Federal Work Study and other service-learning/work experience programs partner with CEP to provide opportunities for placement.

Opportunities by Season

Are you handy with basic tools? Are you good at public speaking? Do you enjoy talking with people? Skilled at data entry? We are looking for people with a variety of skills and backgrounds.

- ❖ Fall / Winter (Sep-Feb): Busy season - opportunities include weatherization, leading workshops, answering phones, or assisting at community fairs.
- ❖ Spring (Mar-May): Leading workshops, conducting follow-up surveys on the phone
- ❖ Year-Round: Office help and professional services (construction, graphic design, interpretation, accounting, grant-writing, etc.)

How Do I Start?

Begin by scheduling an appointment for a volunteer interview/meeting to discuss your interests and available opportunities.

All volunteers participate in an orientation and receive relevant training. Oftentimes orientation and training can occur on the first day of service.

Call the Volunteer Coordinator or email volunteers@communityenergyproject.org
