

Community Energy Project

Empowering People—One Home at a Time

**Changing Lives and
Making a Difference in Portland**

**Dignity, Respect, Equity & Diversity.
Putting Needs of Clients First!**

Community Energy Project annually reaches 1,500 low-income households, providing life-changing services to nearly 4,500 individuals including children, seniors and people with disabilities.

What We Do

Community Education

Provide free workshops that teach practical skills to make homes safer and more energy efficient.

- Do-it-yourself weatherization
- Do-it-yourself insulation
- Lead poisoning prevention
- Lead-safe home projects

In-Home Services

Weatherize and repair homes for low-income seniors and people with disabilities.

- Weatherization
- Health and safety repairs

Volunteers

Orientation and training of hundreds of volunteers each year.

Community Energy Project believes everyone deserves a safe, healthy, efficient home, regardless of income.

Invest in Your Community

Join other community supporters and give comfort, safety and dignity to those most in need.

Diverse Clients

Community Energy Project is committed to serving diverse clients and undertaking new initiatives to improve equity practices across our organization. For more than 37 years we have provided people of color, the disabled, seniors, women, the LGBTQ community and low income populations with high demand programs.

2015/16 Client Income

- Extremely Low Income: Under 30% of Median Income
- Low Income: Under 50% of Median Income
- Moderate Income: Under 80% of Median Income

Strategic Relationships

Community Energy Project builds strategic relationships with nonprofits, government agencies, and community leaders in order to deliver progressive services that meet evolving needs of underserved groups.

We believe that every individual should have a fair and just share of social, natural, and economic resources.

DeNice's Story

DeNice received notice from her homeowner's insurance that she had violations on her property that could lead to policy cancellation. She couldn't afford to have the items addressed so her insurance company dropped her policy.

"If I don't have insurance I could lose my home! My mortgage requires me to have homeowner's insurance."

Painting of some fascia boards, a fallen fence repaired and a tree trimmed, these all seem like small repairs, but to DeNice, a 69 year old senior, getting on a ladder with a paint brush or trimming shears seemed all but impossible.

Through Community Energy Project's In-Home Repairs program, the repairs were made and DeNice was able to get her insurance policy reinstated. DeNice has renewed peace of mind that she will not lose her home, thanks to CEP and its services.
