

Hello!

Thank you for your interest in volunteering at Community Energy Project (CEP).

To better serve our clients and our volunteers we have a few questions to have answered prior to volunteering with CEP.

Please answer the following:

1. We have in-home weatherization, where folks can install window kits in our clients' homes and we have workshop kit assembly, where folks can help us assemble education kits for workshop participants. Which of these two opportunities would you be more interested in doing?
2. What days of the week are you available to volunteer? Mornings or afternoons?
3. Are you wanting to volunteer by yourself or are you interested in organizing a day with coworkers or friends?
4. If you plan to volunteer individually, are you okay with being assigned to a larger group of individuals for a volunteer day?
5. Do you have any questions about volunteering or about CEP?
